New heparin and heparan sulfate derivatives having antithrombotic activity, also endowed with reduced haemorrhagic and anticoagulant activity, are obtained by nucleophilic addition to heparin and heparan sulfate derivatives containing 2,3-anhydroglucuronic acid residues. The compounds have the ...

A process for the synthesis of glycosaminoglycans in which one of the α -L-iduronic-2-O-sulfate acid saccharide units, which is characteristic of glycosaminoglycans with heparin or heparan structure, has undergone a structural modification, entirely or in part, with transformation into α -L- ...

A process for the synthesis of glycosaminoglycans with heparin or heparan structure modified in position 2 of the α -L-iduronic-2-O-sulfate acid in which the sulfate group is, entirely or in part, substituted with a nucleophilic group, is described. The process is carried out by treating ...

Heating and air conditioning modular apparatus
